GEC

PROFESSIONAL ELECTRON TUBES Abridged Data 1976/77

FOREWORD

This catalogue contains abridged data for all the current products of EEV and M-OV, who together offer the most comprehensive range of electron tubes in Europe.

Colour Code

Throughout the catalogue the following colour code is used:—
Brown indicates manufacture by English Electric Valve Co Ltd
Blue indicates manufacture by The M-O Valve Co Ltd

Data

The catalogue is divided into product sections and thumb-indexed for easy access. Full data for any tube are available upon request.

Equivalents Index

A comprehensive equivalents index showing all the tubes for which EEV/M-OV can offer a replacement begins on page 91.

Ordering

So that you obtain prompt service please direct orders for EEV products to Chelmsford and for M-OV products to Hammersmith at the addresses given below. Please do not mix products of both companies on one order.

Issued by The G.E.C. Electronic Tube Company Limited, a Management Company which unites the activities of The M-O Valve Company Limited and English Electric Valve Company Limited.

English Electric Valve Company Limited
Waterhouse Lane, Chelmsford, Essex, CM1 2QU
Telephone: Chelmsford (0245) 61777 Telex: 99103

The M-O Valve Company Limited
Brook Green Works, Hammersmith, London, W6 7PE
Telephone: 01-603-3431 Telex: 23435

© 1976 English Electric Valve Company Limited
and The M-O Valve Company Limited

ABRIDGED DATA

The following pages give abridged data for the current range of EEV/M-OV tubes, devices and accessories.

Comprehensive data sheets giving operating conditions, characteristic curves, and outline drawings are available on request.

Certain types listed in this catalogue may not be available from current production and their supply may be subject to a minimum order quantity. Enquiries for special tubes not included in the catalogue are also welcome.

Colour Code

Throughout the data the following colour code is used:—

Brown indicates manufacture by English Electric Valve Co Ltd

Blue indicates manufacture by The M-O Valve Co Ltd

CARACTERISTIQUES ABREGÉES

Dans les pages suivantes sont données les caractéristiques abrégées pour la gamme courante de tubes, dispositifs et accessoires EEV/M-OV.

Des fiches de caractéristiques établissant les conditions de fonctionnement, les courbes et les schémas d'ensemble sont disponibles sur demande.

Certains types mentionnés dans ce catalogue peuvent ne pas être disponibles parmi les produits de production courante et leur livraison peut être sujette à la commande d'une quantité minimum.

Nous répondons également aux demandes de renseignements pour les tubes spéciaux non mentionnés dans ce catalogue.

Code des Couleurs

Pour toutes les indications nous utilisons le code de couleur suivant:

Marron: produits fabriqués par English Electric Valve Co Ltd

Bleu: produits fabriqués par M-O Valve Co Ltd

KURZGEFASSTE DATEN

Auf den folgenden Seiten finden Sie kurzgefaßte Daten für das gegenwärtige Herstellungsprogramm von EEV/M-OV-Röhren, Geräten und Zubehör.

Ausführliche Datenblätter mit Betriebsbedingungen, Leistungskurven und Maßzeichnungen sind auf Anfrage erhältlich.

Es ist möglich, daß sich einige der in diesem Katalog angeführten Positionen nicht im gegenwärtigen Produktionsprogramm befinden und daß daher deren Lieferung von einer Bestellung von Mindeststückzahlen abhängig gemacht werden muß. Anfragen wegen Spezialröhren, die nicht in diesem Katalog enthalten sind, bearbeiten wir gerne.

Farbkennzeichnung

Die folgende Farbkennzeichnung wird für die Daten verwendet:

Braun: Produkt der English Electric Valve Co Ltd

Blau: Produkt der M-O Valve Co Ltd

RESUMEN INFORMATIVO DE DATOS

En las páginas siguientes aparece un resumen informativo de datos correspondientes a la nueva gama de lámparas, dispositivos y accesorios EEV/M-OV.

Tendremos sumo gusto en facilitar, a solicitud de las partes interesadas, hojas con los datos completos, incluyendo condiciones de funcionamiento, curvas de característica y planos acotados.

Es posible que ciertos tipos detallados en este Catálogo no puedan obtenerse dentro de la línea normal de producción actual y su suministro puede estar sujeto a un pedido mínimo. Sírvanse solicitar información relativa a lámparas especiales, no incluidas en este Catálogo.

Clave de Colores

En todo lugar se ha utilizado la siguiente clave de colores:

Marrón indica fabricado por la English Electric Valve Co Ltd

Azul indica fabricado por la M-O Valve Co Ltd

DATI ABBREVIATI

Alle pagine seguenti figurano dati abbreviati inerenti la presente serie di valvole, dispositivi ed accessori EEV/M-OV.

Le pubblicazioni tecniche più approfondite, contenenti le condizioni di funzionamento, curve delle caratteristiche e disegni del contorno, vengono fornite su richiesta.

Alcuni modelli elencati nel presente catalogo non sono disponibili nella normale produzione e la relativa fornitura può essere subordinata all'ordinazione di un quantitativo minimo.

Nel caso di valvole speciali non incluse nel presente testo, il cliente è pregato di interpellarci.

Colore Codice

Nel presente opuscolo, si usa il seguente codice:—

il marrone indica che la valvola è costruita dalla English Electric Valve Co Ltd

il blu indica che la valvola è costruita dalla M-O Valve Co Ltd

Uprated D	BK482	3225	210	400	—	—	—
Uprated D	BK500	As BK482 but with coaxial cathode terminal flange					

Note Ignitor requirements (anode firing), 12A, 200V, for all a.c. resistance welding types.

EEV Ignitrons — Power Rectification and Control

International letter size	Type	Maximum ratings (at 900V peak)			Ignitor requirements	
		Peak anode current (A)	Average continuous current (A)	Average current 1 minute (A)	Voltage required to fire (min) (V)	Current required to fire (min) (A)
C	BK504/5554	900	100	200	450	45
D	BK46/5555	1800	200	400	450	45

EEV Ignitrons — Capacitor Discharge, Pulse Duty

International letter size	Type	Maximum ratings			
		Peak forward anode voltage (kV)	Peak anode current (kA)	Average anode current (A)	Ampere-seconds per pulse (A.s)
A	7703◇	20	100	0.75	10
A	BK472◆	20	100	0.75	10
A	BK474●	20	100	0.75	10
A	BK476†	20	100	0.75	10
C	BK506	25	100	10	50
D	BK488	25	100	40	200
E	BK496	25	100	80	400

Note Plastic coated versions of all the above ignitrons except size A types are available.

- ◇ For use with high voltage and high current reversal.
- ◆ For reduced degree of current reversal and switching applications.
- † For zero current reversal.

- For current reversal at reduced voltage and current.
- Single phase ratings are for two ignitrons in reverse parallel at any voltage from 250 to 600V_{r.m.s.}

★ Frequency: The lower value indicates the maximum operating frequency at full rating. Operation at the higher value is possible with suitable derating.

◇ Pulse only.

§ Under Class C unmodulated conditions.

△ Maintenance type, not recommended for use in new equipment.

‡ Duty factor 0.2 averaging time 5s.

* A pair of matched tubes with identical serial numbers can be supplied as the DA100B.

◆ BR1512 with mounting flange.

■ Made to special order only.

● Recommended for industrial heating service.

† Two tubes, class AB or B push pull.

♣ Control triode, oil immersed, for switching applications.

□ Integral filament leads.

The DET22 series of disc-seal triodes consists of a range of mechanically identical tubes with electrical characteristics selected into various bands.

The DET22 (CV273) is the basic type and has the widest characteristic spread, while the DET22D, E, R and S have more tightly controlled characteristics. All the types give similar performance, but one or other of the selections may be preferred when the range of circuit adjustment is limited.

Type	at $V_a = 250V$			c_{a-g} (pF) (measured on a cold unscreened tube)

Standard voltage steps only are listed. Other voltages can be made available to special order.

SC6 between 10 and 14.9kV is available but is only suitable for use in an oil bath.

An encapsulated version of the SC7, ref. SC7/E is available for use under conditions of high humidity.

* A special quality version of the SC5, for use under conditions of shock and vibration, is available as the QSC5 (CV8960).

■ Made to special order only.

EEV Balanced Duplexers

EEV manufactures a range of balanced duplexers designed to meet customers' individual requirements at frequencies from 1.0 to 17GHz. The basic balanced duplexer consists of two 3dB hybrid couplers, with a twin pre-TR tube and a high power load. The couplers can be supplied in various configurations e.g. E-plane, H-plane etc. In addition, TR tubes, protector tubes, TR limiters, PIN switches or other devices can be supplied for receiver protection. Typical balanced duplexer configurations are given below; enquiries are invited regarding the best arrangement of devices for particular applications.

Frequency range (MHz)	Type	Dual pre-TR tube	Peak power (MW)	V.S.W.R.	Recovery period (μ s)	Insertion loss (dB)
1215–1365	BS624	BS910	0.15	1.3	12	0.5

S-Band R.F. Head BS598, Mixer Receivers BS694 and BS548

EEV R.F. Heads

EEV can supply a complete range of compact, low noise r.f. heads in the frequency range from 1.0 to 10 GHz, for applications ranging from marine radar to sophisticated military systems. The r.f. head includes magnetron, duplexer (either conventional T, balanced or using circulators), TR limiter, balanced or single ended mixer, local oscillator (Gunn diode or transistor depending on frequency) and 1st stage i.f. amplifier. Additional facilities are available, including a.f.c. and a.g.c. if required.

All r.f. heads produced by EEV are designed to meet individual customer requirements.

The components for a typical 25kW r.f. head type BS598 are given below; the peak power may be substantially increased by using a higher power magnetron.

Magnetron (25kW)	M5020	Varactor limiter	BS168
Duplexer	BS748	Mixer receiver	BS582
TR tube	BS894	Local oscillator	BS742

◇ 10% bandwidth.

□ Dependent on power level.

☆ Primerless TR limiter.

★ Primed TR limiter.

* Preset to customers' requirements.

EEV Noise Generator Power Supplies

Type	Description
BS610 series	Solid state, current stabilized power supply units for use with EEV gas discharge noise tubes. An output current meter is incorporated and automatic filament pre-heat and starting circuits are built-in.
BS650	Power supply unit for use with EEV gas discharge noise tubes. The output current is stabilized over a wide adjustment range and may be monitored by a front panel meter. Automatic filament pre-heat and an advanced tube striker are built-in.
BS690	Power supply unit for use with the EEV range of solid state noise generators and similar devices. The stabilized output current is adjustable over a wide range with the front panel meter and a lockable ten turn potentiometer.
BS692	Power supply unit for use with the EEV range of solid state noise generators and similar devices. It can be used in either a continuous or switched mode, clocked by an internally generated signal or by an external trigger signal. The fast switching times and accurate timing facilities enable rapid inter-pulse noise measurements to be made on a radar system without modulating incoming signals. The slower speed ranges and longer pulses allow it to drive the noise source in conventional switch radiometer applications.

EEV Transmission Line Pressure Windows

Glass-to-metal resonant windows as used in duplexer tubes can be supplied for application where a gas pressure differential is to be maintained in a waveguide system, with a high degree of transparency to microwave signals.

The windows listed below may be sealed into a socket with soft solder or a conducting epoxy resin. Windows required to be soldered will be supplied ready tinned to customer requirements on request.

The maximum peak power transmission capability of the window is dependent on the waveguide pressure differential. The maximum capability specified below applies to operation in air at atmospheric pressure. It increases considerably at higher pressure differentials.

Resonant frequency (MHz)	Type	Bandwidth at v.s.w.r. 1.2:1 (MHz)	Peak power max. (kW)	Resonant frequency (MHz)	Type	Bandwidth at v.s.w.r. 1.2:1 (MHz)	Peak power max. (kW)

8500–10000	BS502 (CV6005)	20	18	2.0	68	1.3	BS512 BS546

Note A monitor diode power supply type BS602 or power supply and indicator unit type BS600 is available for use with the above types.

Monitor Diode Kit BS614

EEV Monitor Diode Kit

Type	Description
BS614	The kit is intended for field tests of X-band radar transmitter performance. It is based on a monitor diode and permits measurement of peak output power, pulse parameters and irregularities in the transmitter performance. The kit includes a calibrated monitor diode and mount assembly, power supply, directional couplers and accessories to suit the users' requirements, all packed in a fitted carrying case. An oscilloscope and mains power source are the only additional facilities needed.

Δ Maintenance type, not recommended for use in new equipment.

* Required frequency to be specified.

\S Rugged.

ϕ Quick heat cathode.

\star Improved tuner mechanism.

\oplus Encapsulated to reduce stray radiation.

\ddagger Mechanically tuned over the specified frequency range.

■ Made to special order only.

\diamond Low thermal coefficient of frequency.

\ddagger Water-cooled electro-magnet assembly M4011, including launching section M4017, available.

X-Band*	N1061 ■	900	0.005	33	100	31	N4115

EEV Travelling Wave Tubes — Broadband, Rugged

The range consists of tubes of rugged metal/ceramic construction, designed to meet severe environmental requirements and suitable for military communications, ECM systems etc. The tubes are integral with their periodic permanent magnet focusing mounts and are conduction cooled. Related tubes at other frequencies and power levels or in alternative physical designs, for use under pulse, c.w. or phase modulated conditions, are available and enquiries are invited.

EEV can supply complete travelling wave tube amplifier chains, including gain equalizers, where higher gain and efficiency than similar single tube systems is required.

M-OV Waveguide Circulators and Isocirculators

This range of devices uses a special form of construction avoiding the use of adhesives for holding the ferrite in position to give excellent thermal and mechanical shock resistance.

Configuration: T-form. **Temperature range:** 0–50°C.

Isocirculators WGI Series: The full range of circulators may be supplied with a built-in matched load (within the circulator housing) on any specified port. This load is of low power (2 watts) but larger loads can be fitted to special order.

- Storage Tubes
- Glow Modulators
- Flash Tubes

Development is proceeding on a wide range of electro-optical devices and enquiries are invited for specific applications. Most of the television camera tubes can be supplied in alternative forms (radiation resistant and fibre-optic faceplates, vidicons with faceplate reticles, etc).

Leddicons (top to bottom) P8130, P8021 and P8142

EEV Television Camera Tubes — Leddicons

Photoconductive camera tubes with high sensitivity lead oxide target, for high definition pick-up in monochrome and colour broadcast cameras. Features of these tubes include very short lag, low dark current and unity gamma.

Type

Series	Suffix letters [□]	Description
P8000	M, B, G, L, R, X	30mm diameter, integral mesh
	M IG, B IG, G IG, L IG, R IG	Industrial grades of above tubes
P8001	M, B, G, L, R, X	30mm diameter, separate mesh
	M IG, B IG, G IG, L IG, R IG	Industrial grades of above tubes
P8003	RF, GF, LF, MF	30mm diameter, separate mesh, with extended red response and infrared filter
	AR, AG, AL, AM	As above but without infrared filter
P8005	M, B, G, L, R	30mm diameter, separate mesh, with variable light bias
P8008	M, B, G, L, R	30mm diameter, separate mesh, with fixed light bias and highlight overload protection
P8021	M, B, G, L, R	1-inch diameter, separate mesh, interchangeable with comparable vidicons
P8022	M, B, G, L, R	1-inch diameter, separate mesh, with light bias; interchangeable with 1-inch vidicons
P8023	RF, GF, LF, MF	Similar to P8021 but with extended red response and infrared filter
	AR, AG, AL, AM	Similar to P8021 but with extended red response and no infrared filter
P8024	RF, GF, LF, MF	Similar to P8022 but with extended red response and infrared filter
	AR, AG, AL, AM	Similar to P8022 but with extended red response and no infrared filter

EEV Television Camera Tubes — Leddicons continued

Type	Series	Suffix letters [□]	Description
P8130	M, B, G, L, R		30mm diameter, coaxial construction, with facility for integral or separate mesh operation. Fixed internal light bias
P8131	M, B, G, L, R		30mm diameter, coaxial construction, with facility for integral or separate mesh operation. Variable internal light bias
P8132	RF, GF, LF, MF		Similar to P8130 but with extended red response and infrared filter
	AR, AG, AL, AM		Similar to P8130 but with extended red response and no infrared filter
P8133	RF, GF, LF, MF		Similar to P8131 but with extended red response and infrared filter
	AR, AG, AL, AM		Similar to P8131 but with extended red response and no infrared filter
P8141	M, B, G, L, R		Rear loading version of P8021 series
P8142	M, B, G, L, R		Rear loading version of P8022 series
P8143	RF, GF, LF, MF		Rear loading version of P8023F series
	AR, AG, AL, AM		Rear loading version of P8023A series
P8144	RF, GF, LF, MF		Rear loading version of P8024F series
	AR, AG, AL, AM		Rear loading version of P8024A series

EEV Television Camera Tubes — 1-inch Vidicons Integral Mesh, Magnetic Focus and Deflection

Type	Derivative	Application	Characteristics	Blemish standard	Heater current at 6.3V (mA)	Photo-surface (see page 69)
7735B		High quality broadcast, educational, telecine and industrial.	Very high sensitivity with colour response similar to the human eye. Short lag.	Premium	600	ii
	7735A	General purpose closed circuit systems.	High sensitivity and short lag.	1st Grade	600	ii
	7735	Industrial closed circuit systems.	Version of 7735A with relaxed blemish/electrical specification.	Commercial	600	ii
	P826/4478	Low cost industrial and surveillance.	Similar to 7735 series but with relaxed blemish specification.	Industrial	600	ii
	7262A	Monochrome broadcast, educational, industrial and surveillance where camera design necessitates a tube of reduced length.	Short version of 7735B series with the same characteristics.	†	95	ii
7735BX	Medical use in conjunction with X-ray sensitive image intensifier.	Photosurface developed to match intensifiers with P20 phosphor.	Premium	600	v	
7038		Colour or monochrome telecine and caption scanning. Can be selected for use in PE24 camera.	Medium/high sensitivity but short lag at high light levels. Resistant to image retention.	1st Grade	600	i
P8034■		Radar screen viewing. Low light level surveillance where scene motion is limited.	Very high sensitivity, long lag photosurface for normal and slow scan operation at low light levels.	†	600	iv

† Specific tube grades and electrical parameters can be negotiated.

■ Made to special order only.

□ The complete type number comprises the series number with appropriate suffix letter/letters as follows:—

B Blue channel	L Luminance channel	R Red channel
G Green channel	M Monochrome	X Medical

The letters IG added to the above indicate industrial grade.

In the case of monochrome tubes, the letter M is usually omitted from the type number.

For example, P8000 is for monochrome, P8000B is for the blue channel in broadcast cameras and P8000B IG is for the blue channel in industrial applications.

EEV Television Camera Tubes — 1-inch Vidicons Separate Mesh, Magnetic Focus and Deflection

Type	Derivative	Application	Characteristics	Blemish standard	Heater current at 6.3V (mA)	Photo-surface (see page 69)
8507A (P841)		Broadcast, educational and high quality industrial.	Colour response similar to human eye. High sensitivity at all light levels. Moderate sensitivity to red up to 900nm. Short lag.	1st Grade	600	ii
8507 (P848)		Industrial and educational.	High sensitivity and short lag, relaxed blemish specification.	Commercial	600	ii
P848D		Industrial and surveillance.	P848 with relaxed specification.	Industrial	600	ii
P841X		Medical use in conjunction with X-ray sensitive image intensifier.	Photosurface developed to match intensifiers with P20 phosphor output.	†	600	v
8541A (P842)		Broadcast, educational and high quality industrial.	Colour response similar to human eye. High sensitivity at all light levels. Moderate sensitivity to red up to 900nm. Short lag.	1st Grade	95	ii
8541 (P849)		Industrial and educational. Replacement for P864 (near equivalent).	High sensitivity and short lag, relaxed blemish specification.	Commercial	95	ii
P849D		Industrial and surveillance. Replacement for P862 (near equivalent).	P849 with relaxed specification.	Industrial	95	ii
P866■		Broadcast, educational, industrial and surveillance where camera design necessitates a tube of reduced length.	Short version of the 8541A group, with the same characteristics.	†	95	ii
P842X		Medical use in conjunction with X-ray sensitive image intensifier.	Photosurface developed to match intensifiers with P20 phosphor output.	†	95	v
8572A (P843)		Colour or monochrome telecine and caption scanning. Can be selected for use in PE24 and PE240 cameras. Available with anti-halation faceplate stud.	High sensitivity but very short lag at high light levels. Resistant to image retention.	1st Grade	600	i
P844		Colour or monochrome telecine and caption scanning.	Low power heater version of 8572A (P843)	1st Grade	95	i
8625 (P846)		Monochrome broadcast, studio and educational.	High sensitivity with very short lag at studio light levels. Improved colour rendition when used with tungsten lighting.	1st Grade	600	iii
8626 (P847)		Monochrome broadcast, studio and educational.	Low power heater version of 8625 (P846).	1st Grade	95	iii
P8031		Industrial and educational	High sensitivity and short lag. For use in cameras requiring 300mA heater.	Commercial	300	ii
P8034A		Radar screen viewing. Low light level surveillance where scene motion is limited.	High sensitivity, long lag photo-cathode for normal and slow scan operation at low light levels.	†	95	iv
P8038		Colour telecine, selected for use in TK28 camera.	High sensitivity and short lag. Signal output and resolution uniform over whole raster.	1st Grade	95	ii
P8038B		Blue channel of colour telecine, selected for use in TK28 camera.	High sensitivity and short lag. Signal output and resolution uniform over whole raster.	1st Grade	95	iii

■ Made to special order only.

† Specific tube grades and electrical parameters can be negotiated.

‡ Can be purchased with scanning/focus/alignment coil assembly.

EEV Television Camera Tubes — 1-inch Rugged Vidicons Separate Mesh, Magnetic Focus and Deflection

Type	Application	Characteristics	Blemish standard	Heater current at 6.3V (mA)	Photo-surface (see page 69)
P831 (CV8797)	Military and industrial involving shock and vibration.	Short tube of robust construction, with electrical characteristics similar to 8541A.	†	95	ii
P863‡ (CV6243)	Military and industrial involving shock and vibration.	Developed from P831, with mesh connected to ring contact adjacent to target connection to eliminate pick-up from these leads.	1st Grade	95	ii
P8018A■	Military and industrial involving shock and vibration.	Ultra short, with integral focus and deflection coils. Robust construction.	1st Grade	95	ii
P8018B■	Military and industrial involving shock and vibration.	Same as P8018A but with signal lead brought out at base end.	1st Grade	95	ii
P8201	Military and industrial involving shock and vibration.	Very short (4 inches — 102mm) with compact integral focus and deflection coils. Robust construction.	1st Grade	95	ii

Vidicon P8018A

EEV Television Camera Tubes — 1-inch Vidicons Electrostatic Focus and Magnetic Deflection

Type	Application	Features	Blemish standard	Heater current at 6.3V (mA)	Photo-surface (see page 69)
8134	Broadcast and industrial, compact monochrome.	7735B colour response and blemish specification.	1st Grade	95	ii
8134V1/4811	Broadcast, colour, telecine. Can be supplied in matched sets for RCA TK27 camera.	Uniform sensitivity and geometry for multi-tube colour cameras. It can be selected for use in the red, blue or green channels.	Premium	95	ii
P893/4493	Red channel of RCA TK42 and TK43.	Reduced picture area of uniform sensitivity and geometry.	1st Grade	95	ii
P894/4494	Green channel of RCA TK42 and TK43.	Reduced picture area of uniform sensitivity and geometry.	1st Grade	95	ii
P895/4495	Blue channel of RCA TK42 and TK43.	Reduced picture area of uniform sensitivity and geometry.	1st Grade	95	ii

EEV Television Camera Tubes — 1½-inch Vidicons Electrostatic Focus and Magnetic Deflection

Type	Application	Features	Blemish standard	Heater current at 6.3V (mA)	Photo-surface (see page 69)
8480	Colour or monochrome cameras, telecine and high grade industrial.	Low deflection power, negligible electrostatic focusing power. Reduced camera size by eliminating focus coil. High resolution.	1st Grade	95	i
8480V1/4810	High quality colour cameras such as RCA TK27.	Similar to 8480 but tested to closer limits for signal uniformity, beam astigmatism and other characteristics.	Selected	95	i

Vidicons (top to bottom) 8480V1, 8051 and P8090

EEV Television Camera Tubes — 1½-inch Vidicons Separate Mesh, Magnetic Focus and Deflection

Type	Application	Features	Blemish standard	Heater current at 6.3V (mA)	Photo-surface (see page 69)
8051■	Broadcast telecine or high resolution data transmission.	Limiting resolution in the region of 2000 TV lines. Very short lag at high light levels.	1st Grade	600	i
8521■	High grade industrial.	Colour response similar to that of human eye.	1st Grade	600	ii

EEV Television Camera Tube — Pyroelectric Vidicon

Type	Application	Description
P8090‡	Infrared imaging	Maximum sensitivity in the 8 to 14 micron band, with thermal resolution better than 0.2°C. Mechanically similar to 1-inch separate mesh vidicons.

‡ EEV test camera P4176 is available to special order for evaluation of P8090 pyroelectric vidicon.

■ Made to special order only.

EEV Vidicon Photosurfaces

Type	Description
Photosurface i	High sensitivity photosurface with very short lag at high light levels. Resistant to image retention and intended for colour or monochrome telecine and caption scanning.
Photosurface ii	The colour response peaks in the green region and extends into the near infrared; near panchromatic response is obtained in daylight. This photosurface provides higher sensitivity than type i and has high sensitivity at both high and low light levels. It must not be exposed to bright lights for long periods.
Photosurface iii	This photosurface is similar in sensitivity to type ii but its colour response peaks in the blue region. It provides improved colour rendition with tungsten illumination. It has extremely short lag when used at light levels of 1–10 ft-candles incident on the faceplate.
Photosurface iv	This photosurface has been specially designed with long lag characteristics. It is intended for integrating repetitive light inputs of low level such as from X-ray image intensifier screens or cathode ray tube displays.
Photosurface v	High sensitivity, medium lag photosurface developed for use with X-ray image intensifiers. The spectral response is very similar to photosurface iii and is well matched to P20 phosphor.

EEV Television Camera Tubes — Image Orthicons

Size	Nominal image diagonal	Type	Application	Description
3-inch	1.60 inch	P874 †	High quality studio and outdoor broadcast, monochrome or colour.	High target capacitance and signal to noise ratio.
3-inch	1.60 inch	P875 †	High quality studio and outdoor broadcast, monochrome or colour.	Similar to P874 but with lower target capacitance.
3-inch	1.60 inch	P882 †	High quality studio and outdoor broadcast.	Similar to P874, with bialkali photocathode giving increased sensitivity.
3-inch	1.60 inch	P883 †	High quality studio and outdoor broadcast.	Similar to P875, with bialkali photocathode giving increased sensitivity. Lower target capacitance than P882.
4½-inch	1.60 inch	7295C (P811/E)	High quality studio and outdoor broadcast.	Medium target capacitance producing approximately half power law gamma when operated one stop above the 'knee'. Unilateral replacement for 7295B. Higher signal to noise ratio and resolution than 3-inch tubes with similar target spacing.
4½-inch	1.60 inch	7389C (P822/E)	For use in studios under controlled lighting conditions. Recommended for use in cameras containing gamma correction circuits.	Tube with higher target capacitance than the 7295C. Minimal spurious signals enabling pictures of photographic quality to be produced. The higher target capacitance gives improved signal to noise ratio and extended linear transfer characteristics. Unilateral replacement for 7389B.
4½-inch	1.60 inch	P858	For use as the luminance tube in colour cameras such as TK42/43. Equally suitable for monochrome cameras.	Tube tested for operation at target voltage up to 4 volts.
4½-inch	1.60 inch	P872	For use in studios under controlled lighting conditions. Recommended for use in cameras containing gamma correction circuits.	Similar to 7389C, with bialkali photocathode giving increased sensitivity.
4½-inch	1.60 inch	P873	High quality studio and outdoor broadcast.	Similar to 7295C, with bialkali photocathode giving increased sensitivity.

Image Orthicons P875 (top) and 7295C

Note All the Image Orthicons listed incorporate the ELCON target, (Brit. pat. no. 1048390). The use of ELCON targets results in the virtual elimination of image retention (sticking) and gives stability of sensitivity throughout tube life.

† All EEV 3-inch image orthicons incorporate an anti-ghost image section, a field mesh and a suppressor electrode. Features resulting from the design include the elimination of dynode background and an improved signal to noise ratio.

55mm Image Isocon P8041 (top), 3-inch type P880 (centre) and 4½-inch type P850 (bottom)

EEV Television Camera Tubes — Image Isocons

With a fixed beam current, image isocons will reproduce scenes having a wide dynamic range, with good tonal response and without the beam noise associated with image orthicons.

Size	Nominal image diagonal	Type	Application	Description
55mm	40mm	P8040	Television pick-up at very low light levels (moonlight conditions).	High sensitivity tube with plain glass faceplate. It is particularly suitable where high performance from a small camera is required. The tube can be supplied fitted with a deflection yoke.
55mm	40mm	P8041	Television pick-up at very low light levels (moonlight conditions).	High sensitivity tube, identical with P8040 but with fibre-optic faceplate.
3-inch	1.60 inch	P880	Television pick-up at very low light levels. It can also be used in X-ray applications.	High sensitivity tube, externally similar to image orthicon; most image orthicon cameras can readily be modified to accept it.
3-inch	40mm	P887	Television pick-up at very low light levels (moonlight conditions).	Similar to P880 with fibre-optic faceplate for coupling to image intensifiers.
4½-inch	3.25 inch	P850	Television pick-up from very low intensity images of X-ray fluoroscopic screens, and similar applications at very low light levels.	High sensitivity tube with curved faceplate.

Note Test camera P4150 can be supplied to special order, for test and evaluation of 3-inch and 55mm tubes.

EEV Television Camera Tubes — Intensifier Image Isocons

Isocon size	Nominal image diagonal	Type	Application	Description
55mm	40mm	P8096 ■	Television pick-up at very low light levels (starlight conditions).	Combination of 55mm image isocon and a single stage intensifier with fibre-optic coupling. It operates with a scene illumination of 10^{-4} ft-candle.
3-inch	40mm	P8095 ■	Television pick-up at very low light levels (starlight conditions).	Combination of 3-inch image isocon and a single stage intensifier with fibre-optic coupling. It operates with a scene illumination of 10^{-4} ft-candle.

Intensifier Image Isocon P8095 (top), P8096 (centre) and Image Intensifier P896A (bottom)

EEV Image Intensifiers

3-stage, fibre-optic coupled image intensifier assembly for night vision applications, encapsulated in silicone rubber complete with e.h.t. multiplier. The input is S25 and a P20 phosphor is used for the output screen.

Useful diameter (mm)	Type	Magnification (approx)	Luminance gain (apostilb/lux) (min)	Equivalent background illuminance (lux) (max)	Resolution at centre (min) (line pairs/mm)
25	P896A †	0.82 to 1.0	5×10^4	2×10^{-7}	30
25	P8076A ‡	0.82 to 1.0	5×10^4	2×10^{-7}	30

† A.C. input voltage 2.7kV peak to peak.

‡ D.C. input voltage 6.75V. Internal automatic brightness control.

Note Test camera P4150 can be supplied to special order, for test and evaluation of 3-inch and 55mm tubes.

■ Made to special order only.

EEV Proximity Focused Image Intensifiers

This series of high gain proximity focused image intensifiers is available for applications where size, weight and image uniformity are of importance. The standard versions have an S25 photocathode on a fibre-optic faceplate, with P20 phosphor and fibre-optic output window. An anti-halation phosphor screen backing which ensures good low spatial frequency contrast at the operating voltage of 8kV is incorporated as standard. Other photocathodes and input faceplate materials are available.

Image diameter (mm)	Type	Photo-cathode luminous sensitivity ($\mu\text{A}/\text{lm}$)	Photo-cathode radiant sensitivity at 850nm (mA/W)	Limiting resolution (line pairs/mm)	Luminous gain (ft-L/ft-candle)	Magnification	Noise-equivalent input (μlux)
18	P8101	350	10	40	50	1.0	0.2
25	P8102	350	10	40	50	1.0	0.2
40	P8103	350	10	40	50	1.0	0.2
75	P8104	350	10	40	50	1.0	0.2

EEV Shutter Tubes

Electrostatically focused image converters with electrostatic deflectors, for both pulse and sweep operation; the deflection system enables the tubes to function as an electronic shutter.

When used in a suitable camera* the tubes can display a sequence of frames showing the development of a high speed event.

The tubes are available with an output faceplate of either plain glass or fibre-optic of 90mm diameter; the useful screen diameter is 75mm.

Useful screen area (mm)	Type	Structure	Equivalent light input (max) (ft-candle)	Static resolution (min) (line pairs/mm)	Photo-cathode▲	Screen●	Operating voltage (kV)
75 x 40	P855	Tetrode	10^{-6}	13	S20	P11	16
75 x 40	P856	Triode	10^{-6}	13	S20	P11	18

Shutter Tube P856

* Available from John Hadland Ltd., Newhouse Laboratories, Bovingdon, Herts.

▲ Also available to special order with S1, S9, S11 or S25 photocathode.

● Also available to special order with P20 screen.

EEV Flash Tubes

EEV produces a complete range of linear flash tubes for operation at medium and high energy loadings.

The following list shows the minimum and maximum arc lengths available for flash tubes of standard manufacture, arranged in order of bore diameter. Flash tubes of any arc length between the limits shown can be supplied; full technical specifications are available on request.

The XL639 series of flash tubes are of 'bright seal' design and can be supplied in bore diameters additional to those listed.

The XL615 series are of 'solder seal' design and can only be produced in the standard bore diameters shown below.

Bore diameter (mm)	Type	Arc length range (inches)	Operating voltage (kV)		Trigger voltage (kV)	Input energy (joules) [†]
			minimum	maximum		
2.0	XL639/2/0.5	0.5 to	0.4	1.2	10	60

TPD Transistor protection device or TPD is an effective means of limiting the energy dissipated in transistor circuitry connected to the electrodes of a radar cathode ray tube in the event of voltage flashover. It can be provided as an optional extra on most M-OV radar tubes and supplements the protection that the principal radar manufacturers build into their equipments.

† Adjusted for cut-off
 ☆ Bezel has metric thread
 § Bezel has imperial thread

△ Maintenance type, not recommended for use in new equipment.
 ■ Made to special order only.
 * Near equivalent.

M-OV Arrester Mounts

Type	Description
53	A unit for surge arrester type 16 incorporating two gaps. The base is of glazed ceramic providing high insulation resistance and dimensional stability in humid conditions.
54	A composite mounting for surge arrester type 16 incorporating mount type 53 with connections for type 34 fuses in twin protection.
55	An enclosed composite mounting for surge arrester type 16 and two type 34 fuses, primarily designed for subscribers' instrument protection.
56A	A strip mounting to accommodate 10 type 53, 54 or 59 arrester mounts.
56B	Similar to 56A but with accommodation for 20 type 53, 54 or 59 arrester mounts.
57	A pole mounted weatherproofed enclosure incorporating a type 53 arrester mount. The earth connection is connected to the mounting spindle. The unit may be used either as a terminal or a 'T' junction.
59	A unit designed for two arresters type 13 and two fuses type 34; designed for strip mounting on mounts 56A or 56B.
60	Open-sided ceramic sleeve between two end caps to take a surge arrester type 16. This is a replacement unit for special applications such as those which originally used the earlier types Drg. 36 and Drg. 36/2.
61	A unit for surge arrester type 16. Similar to the type 53 but with provision for rear mounting.
63	A simple slide-in mount incorporating a surge arrester type 16. Suitable for mounting in banks on distribution frames.
66	A mount suitable for the type 21 arrester. The mounting forms part of an existing range of interlocking parts which can be built up into terminal banks sized to suit the end user.
67	A block of 10 mounts similar to the 53 but without spark gap. The block is designed to be split into two sets of 5 if required.

A group of Arresters and Mounts

M-OV Fuses

Standard porcelain body fuse with knife type contacts for use in mount types 54, 55 and 59. Available as type 34A 2.5 amp, 34B 0.5 amp, 34C 1.0 amp, 34D 1.5 amp.

Type 2B fuse dummies are available. These are interchangeable solid connectors to replace type 34 fuse.

15	SD15000A■	2000	§	1.5	5.0	—

§ The SD15000A is a self-triggered diode. It fires if the rate of rise of anode voltage exceeds $3\text{kV}/\mu\text{s}$ but does not fire if the rate of rise of anode voltage is less than $30\text{kV}/\text{ms}$.

M-OV Geiger Müller Tubes — Organically Quenched

GEC organically quenched tubes use ethyl formate as the quenching agent, which has many advantages over ethyl alcohol. Tubes using ethyl formate have better plateau characteristics, longer life, better temperature coefficient and a lower minimum operating temperature.

Plateau length average (V)	Type★	Plateau slope average (%)	Operating voltage limits (V)	Count life	Shielded back-ground counts/min.	Signal output (V)◆	Dead time (μ s)	Recovery time (μ s)

EEV EBW Devices

EEV produce Detonators, Squibbs and Triggered Vacuum Gaps for exploding bridge wire (EBW) circuits. These devices are produced to exacting safety standards.

Triggered Vacuum Gap

◆ C is the total capacitance across the tube, in pF.

★ The operating temperature range of all types is -20 to $+50^\circ\text{C}$.

PLANCHETS can be supplied; 15mm, 25mm, flat or dished.

- Nernst Filaments

EEV Spark Gaps

EEV manufactures a comprehensive range of spark gaps for ignitor applications, d.c. protection, heavy current applications and for the protection of pulsed circuits. Each of the styles listed below comprises a series of spark gaps with breakdown voltages covering the specified range. Customers' enquiries for spark gaps to suit individual requirements are invited.

Series	Number of electrodes	Range of breakdown voltage (kV)	Cumulative charge rating (coulomb)	Connections/ mounting
GXA	2	8-16 (pulsed d.c. over a range 1000-1200p.p.s.)	100	CT2 end cap and octal base
GXB	2	8-16 (pulsed d.c. over a range 1000-1200p.p.s.)	100	CT2 end caps
GXC	2	0.5-30 (d.c.)	100	Flexible leads
GXD	2	0.5-25 (d.c.)	75	CT1 end caps
GXE	2	0.5-3.0 (d.c.)	50	Flexible leads
GXF	2	0.5-15 (d.c.)	20000	Bolt on
GXK	2	0.4-12 (d.c.)	50	CT1 end caps
GXL	3	0.4-12 (d.c.)	50	CT1 end caps
GXN	2	0.4-12 (d.c.)	400	CT1 end caps
GXO	3	0.4-12 (d.c.)	400	CT1 end caps
GXP	2	0.4-12 (d.c.)	50	Stud mounted
GXQ	3	0.4-40 (d.c.)	1000	Screw mounted
GXR	2	0.4-12 (d.c.)	400	Stud mounted
GXS	2	0.5-30 (d.c.)	100	Flexible leads
GXU	2	0.4-12 (d.c.)	400	CT1 end caps

GXW	2	0.4-30 (d.c.)	1000	Screw mounted
GXX	2	16-20 (d.c.)	75	Stud mounted

EEV Trigatrons

Peak output power (kW)	Type	Pulse repetition rate max (p.p.s.)	Pulse duration max (μ s)	Hold-off voltage max (kV)	Trigger voltage min (kV)	Base
160	24B1 (CV6008) 24B9 (CV6173)	3000	1.0	10.5	5.0	CL3

EEV Ozotrons — Halogen Sensitive Elements

The ozotron will detect minute quantities of halogen or halogen compound gases in the atmosphere.

Three types of ozotron are available. Type H has a glass envelope; types G and J have ceramic envelopes and are demountable so that the inner electrodes can be cleaned.

The three types are capable of detecting halogen concentrations of 1 part in 1 500 000. A leakage of Arcton (dichlorodifluoromethane) at the rate of 1.5 milligrams per day (0.02 ounce per year) can be located.

EEV Methane Detector Elements

The methane detectors listed below consist of two elements which are used as two arms of a bridge circuit. They are designed to detect methane in air in concentrations from 0.1% upwards. There is no interference from water vapour or carbon dioxide. The minimum sensitivities specified apply when the recommended circuit and mounting are used.

Type	Minimum sensitivity (mV/% methane)	Linearity (% methane)	Response time (sec)★	Maximum methane concentration (%)	Bridge supply (V)	Bridge power consumption (W)
VQ1	20	up to 3	2	10	2.0 ± 0.1	0.75
VQ2	15	up to 3	2	5	2.0 ± 0.1	0.48
VQ3	20	up to 3	2	6	2.5 ± 0.1	1.1
VQ4◇	20	up to 3	2	10	2.0 ± 0.1	0.75
VQ6	A pair of inactive elements for use in detecting up to 100% concentration of gas.					

A group of Spark Gaps with pairs of Methane Detector Elements in the foreground

EEV Nernst Filaments — Infra Red Sources

Type	Operating current		Temperature range (°C)	A.C. supply voltage◆ (V)	Voltage drop (V _{r.m.s.})
	minimum (A _{r.m.s.})†	maximum (A _{r.m.s.})‡

NFT10	0.3	1.2	1125–1625	200–250	60–80

† Minimum value for stable operation.

◇ Two elements supplied on a single mount.

‡ For maximum operating temperature.

◆ With suitable series impedance.

★ Time to register 1¼% in a 2¼% concentration.

INDEX D'EQUIVALENCE DES TUBES

Cet index comprend les tubes de divers fabricants et pour le remplacement desquels il existe des tubes EEV/M-OV. Les numéros des types CV et NATO sont également inclus.

Les types mentionnés dans la colonne 'EEV/M-OV replacement' peuvent être utilisés directement pour le remplacement de ceux mentionnés sous le titre 'type to be replaced' sauf lorsque marqué d'un astérisque * qui indique qu'il peut être nécessaire de procéder à une légère modification en raison d'une différence mineure mécanique ou électrique. Pour plus de détails de ces différences s'adresser à EEV.

Lorsque le symbole † est porté dans la colonne 'page number' les caractéristiques abrégées de ce tube ne sont pas données dans cet index mais nous répondrons à toute demande de renseignements.

Code des Couleurs

Pour toutes les indications nous utilisons le code de couleur suivant:—

Marron: produits fabriqués par English Electric Valve Co Ltd

Bleu: produits fabriqués par M-O Valve Co Ltd

LISTE GLEICHWERTIGER RÖHREN

Diese Liste zeigt Röhren verschiedener Hersteller, welche durch Röhren von EEV/M-OV ersetzt werden können. CV und NATO-Typennummern werden ebenfalls angeführt.

Die in der Spalte 'EEV/M-OV replacement' angegebenen Typen können direkt als gleichwertiger Ersatz anstelle der Typen in der Rubrik 'type to be replaced' verwendet werden. Bei den mit einem Sternchen * gekennzeichneten Typen können jedoch unbedeutende Abänderungen auf Grund von geringfügigen mechanischen oder elektrischen Unterschieden erforderlich sein. Näheres über diese Unterschiede ist bei EEV erhältlich.

Das Symbol † in der Spalte 'page number' bedeutet, daß für die entsprechende Röhre in diesem Katalog keine Kurzdaten angeführt sind. Anfragen zu diesen Röhren sind uns jedoch willkommen.

Farbkennzeichnung

Die folgende Farbkennzeichnung wird für die Daten verwendet:

Braun: Produkt der English Electric Valve Co Ltd

Blau: Produkt der M-O Valve Co Ltd

INDICE DE INTERCAMBIABILIDAD

En este Índice se dá una relación de lámparas electrónicas de diversas marcas para las que se pueden utilizar como repuesto las lámparas EEV/M-OV. Asimismo, se incluyen los números CV y NATO.

Los tipos que figuran en la columna 'EEV/M-OV replacement' pueden utilizarse directamente como repuestos de los detallados bajo el epígrafe 'type to be replaced' excepto cuando vayan acompañados de un asterisco *, el cual indica que pueden ser necesarias pequeñas modificaciones debido a ligeras diferencias de orden mecánico o eléctrico. Se puede obtener detalles de estas variaciones de EEV.

El símbolo † en la columna 'page number' significa que no se facilita en este Catálogo un resumen informativo sobre la lámpara, pero se suministrarán con el mayor gusto los datos procedentes, a solicitud del interesado.

Clave de Colores

En todo lugar se ha utilizado la siguiente clave de colores:—

Marrón indica fabricado por la English Electric Valve Co Ltd

Azul indica fabricado por The M-O Valve Co Ltd

INDICE DEGLI EQUIVALENTI

Il presente indice elenca le valvole costruite da altre società che possono venire sostituite dalle valvole EEV/M-OV. La distinta elenca parimenti i numeri CV e NATO.

I modelli figuranti nella colonna 'EEV/M-OV replacement' possono venir usati a sostituzione diretta dei modelli elencati sotto la dicitura 'type to be replaced', eccettuato il caso in cui figurì l'asteristico *; in detto caso, occorre apportare lievi modifiche per compensare leggere diversità meccaniche o elettriche. Per ottenere particolari di queste differenze rivolgersi a EEV.

Dove appare il simbolo † nella colonna 'page number', non vengono forniti i dati abbreviati inerenti la valvola; in tal caso, comunque, il cliente è pregato di interpellarci.

Colore Codice

Nel presente opuscolo, si usa il seguente codice:—

il marrone indica che la valvola è costruita dalla English Electric Valve Co Ltd

il blu indica che la valvola è costruita dalla M-O Valve Co Ltd

EQUIVALENTS INDEX

This index lists tubes of various manufacturers for which EEV/M-OV tubes may be used as replacements. CV and NATO type numbers are also included.

The types listed in the column 'EEV/M-OV replacement' may be used as direct replacements for those under the heading 'type to be replaced' except where indicated by an asterisk * which means that minor modifications may be necessary because of slight mechanical or electrical differences. Details of these differences are available from English Electric Valve Co Ltd

Where the symbol † appears in the column 'page number', abridged data for the tube are not given in this catalogue but enquiries are welcomed.

Colour Code

Throughout the data the following colour code is used:—

Brown indicates manufacture by English Electric Valve Co Ltd

Blue indicates manufacture by The M-O Valve Co Ltd
