Warranty And Adjustments

Warranty: Each Westinghouse tube is warranted to be free from electrical or mechanical defects due to workmanship and materials, and to provide satisfactory service under normal operating conditions, within our published ratings, for the periods tabulated below. No other warranties or liabilities for consequential damage can be assumed or implied.

Adjustment will be made by replacement, as outlined below, in kind or by invoice credit, at our option, based on the then current applicable billing price.

Hours of Service are defined as total hours of operation, including time that power is applied to filament or heater.

Important: Instructions for Handling Tubes For Adjustment. For the unusual case where a tube appears to have failed short of warranty, Westinghouse will consider an adjustment if:

1. The tube is returned within 45 days after failure as instructed for each shipment by local Westinghouse Tube Sales Representative. He will provide a numbered Return Authorization and Service Report to fill out and enclose with the tube. Without this information we may not be able to identify the shipment or make an adjustment. It is important to repack the tube adequately and ship, prepaid, via Truck. Prepayment charges will be included in any adjustment if our inspection and test show that the tube did not fulfill our warranty.
2. Original tube identification markings have not been altered or removed.

3. Tube has not been subjected to damage from improper use, storage, transportation or handling.

Disposition: Returned tubes found to be serviceable will be returned to the sender, transportation collect.

Returned tubes found not serviceable and not eligible for adjustment, may be destroyed at the factory after 60 days, unless instructed to the contrary by notation on the Return Authorization accompanying their return.

Returned tubes found not eligible for adjustment but which qualify under our salvage programs for materials, radiator or crate allowance will be credited in accordance with the terms of those programs.

Warranty Class	Full Adjustment Granted On Tubes Failing Prior To Service Time Shown	Pro-rata Adjustment Granted For Failure Within Time Shown Below	In No Event Shall Warranty Extend Beyond Following Period After Shipment From Westinghouse Electronic Tube Factory
A	15 days service	3000 hours	24 months
B	15 days service	12 months*	24 months
D	15 days service	24 months	36 months
E	50 hours service	1000 hours	24 months
F	1 month service	—	18 months
G	50 hours service	500 hours	24 months
H	10000 hours service	—	36 months
I	30 hours service	300 hours	18 months
C J	price includes 5% in lieu of adjustment		
K	50 hours service	750 hours	24 months
L	12 months from date of shipment by Westinghouse		
M	90 days after shipment from Elmira.	12 months	15 months
N	24 months from date of shipment by Westinghouse		
P	5 ampere hours	—	24 months
Q	30 hours service	150 hours	18 months
R	50 hours service	500 hours	12 months

* For neutron and radiation detectors service life is the period during which the tube is in a concentrated radiation flux.

Caution:

Concealed handling damage can void this warranty. Tubes must be handled carefully. If transported, tubes should be checked fully on receipt and after each subsequent handling. Report trouble promptly to carrier to protect your claim.

Ordering Procedure

All orders for Westinghouse Power, Transmitting and Special Purpose Tubes should be directed to the Westinghouse location serving you:

England

Westinghouse Electric International, S.A.
 1-3 Regent Street
 London, S.W. 1, England

France

Compagnie Westinghouse Electrique
 41 George V, Paris 8e

Germany

Westinghouse Electric International, G.m.b.H.
 1 Kleine Wiesenau,
 6 Frankfurt/Main

Italy

Westinghouse Electric International, S.A.
 Corso Venezia 51, Milan

Sweden

Westinghouse Electric International, S.A.
 Albygatan 123, Sundbyberg
