²⁾ Driver stage should be capable of supplying the specified driving power at low distortion. The effective resistance per g_1 circuit should be held at a low value.
 L'étage de commande sera capable de fournir la puissance de commande spécifiée à une distorsion basse. La résistance efficace des circuits de grille sera maintenue à une valeur basse.
 Die Steuerstufe soll im Stande sein die erforderliche Steuerleistung bei kleiner Verzerrung zu liefern. Der effektive Widerstand in den Gitterleitungen soll einen niedrigen Wert haben.

¹⁾For A.C. filament supply
 Pour chauffage du filament par courant alternatif
 Für Wechselstromspeisung des Heizfadens

⁶⁾With fixed grid bias. Cathode bias is not recommended
 Avec polarisation de grille fixe. Polarisation de cathode
 n'est pas recommandée
 Mit fester Gittervorspannung. Vorspannung mittels eines
 Katodenwiderstandes wird nicht empfohlen
