

ADVANCE DATA

The following tube types feature controlled heater warm-up time for operation in 150 Ma series heater strings. They are otherwise identical to their adjacently listed counterparts.

<u>Type No.</u>	<u>Approximate Heater Warm-Up Time (Secs.)*</u>	<u>Counterpart</u>	<u>Counterpart Release No.</u>
12AT6A	17	12AT6	446
12AU6A	17	12AU6	547

NOTES:

- * Heater warm-up time is defined as the time required for the voltage across the heater to reach 80% of its rated value after applying four (4) times rated heater voltage to a circuit consisting of the tube heater in series with a resistance equal to three (3) times rated heater voltage divided by rated heater current.

from JEDEC release #3300, June 12, 1961
